EDUCATION

Texas A&M University

Master of Science in Computer Science

- GPA: 4.00/4.00

December 2027

College Station, TX

Texas Tech University (Honors College)

Bachelor of Science in Computer Science — Summa Cum Laude

- GPA: 3.91/4.00

August 2025

Lubbock, TX

- **Coursework:** Operating Systems, Artificial Intelligence, Object-Oriented Programming, Software Engineering, Database Systems, Data Science in Python, Algorithms, Data Structures, Cyber-Aerial Programming, Differential Equations.

TECHNICAL SKILLS

Programming: Python, C, C++, Java, JavaScript/TypeScript, SQL, HTML, CSS, MATLAB

Frameworks & Tools: React, Next.js, Node.js, Django, Flask, .NET, Git, GitHub, CI/CD, Docker, Linux, Azure, Firebase, MySQL, MongoDB, RESTful APIs, Visual Studio Code, OpenAI, Agile, Angular, Google Collab, multiprocessing

Artificial Intelligence: PyTorch, TensorFlow, Pandas, NumPy, Matplotlib, scikit-learn,

EXPERIENCE

Software Engineer — TTU Health Sciences Center

Quality Assurance Dashboard (React/.NET with SQL backend)

- Built a React/.NET dashboard with a SQL backend serving 1,000+ students to submit lab results for professors
- Deployed the platform on Azure with centralized monitoring and automated error handling to ensure reliability
- Delivered 10+ user-driven enhancements that streamlined grading workflows and reduced manual review time by 30%

August 2024 – December 2024

Lubbock, TX

Teaching Assistant — Texas Tech University

Department of Computer Science (Data Structures and Algorithms & OOP)

- Hosted live-coding sessions and weekly reviews of algorithmic and OOP topics that increased pass rates by 35%
- Created structured learning materials and practice sets aligning Data Structures and Algorithms & OOP topics with exams
- Sent weekly emails to 50+ students summarizing exam deadlines, office hours, and exam results when applicable

August 2024 – May 2025

Lubbock, TX

PROJECTS

Collabo — Collaborative Code Editor

React, Next.js, Monaco, Yjs (CRDT), WebRTC, Custom Signaling (Render), Piston API

- Built a collaborative code editor that lets multiple users edit the same document in real time with full version sync
- Integrated WebRTC peer-to-peer networking and a custom Render-hosted signaling server for smooth live collaboration
- Added secure, multi-language code execution directly in the browser using the Piston API for isolated safe runs

September 2025 – October 2025

QuizLo.ai — Adaptive Quiz Platform

Next.js, Node/Express, MongoDB Atlas, Google Gemini, Retrieval-Augmented Generation (RAG)

- Built an adaptive quiz platform using Next.js and Node/Express that delivers tailored quizzes for students in real time
- Integrated Google Gemini with retrieval-augmented generation (RAG) to generate context-aware questions dynamically
- Designed an adaptive algorithm that adjusts quiz difficulty based on user performance to personalize their learning

August 2025 – September 2025

INVOLVEMENT

Student Outreach Director — Texas Society of Professional Engineers (TSPE)

Texas Tech University Chapter

- Built strong industry partnerships that directly created internship and full-time job opportunities for student members
- Organized large-scale fundraising and outreach events in collaboration with faculty to expand organizational reach
- Coordinated mentorship and networking initiatives connecting students with practicing engineers and TTU alumni

September 2023 – Present

Lubbock, TX
